Jonah Horowitz
San Francisco, CA   incoming@jonahhorowitz.com

Senior Site Reliability Engineer experienced in Amazon Web Services and bare metal hardware deployments. Expert at scaling public and private cloud infrastructure.

Netflix   Los Gatos, CA
Senior Site Reliability Engineer   April 2015 - January 2017

- Drove our "production ready" effort, a checklist of important reliability steps for development teams, and developed a tool that scanned Netflix microservices for reliability risks and made suggestions for teams to improve their reliability

- Consulted with microservice teams to drive reliability efforts, including adding monitoring, alerting, deployment practices, application tuning and chaos resiliency

- Lead post-mortem incident reviews to identify root cause and ensure remediation and created a new "after-incident report" process so single page write-ups of incident learnings could be communicated broadly throughout Netflix

- Participated in oncall rotation and incident response, initial triage, ensuring communication and making sure engineering teams were focused on mitigating customer impact during major outages

Quantcast   San Francisco, CA
Lead Production Engineer   January 2011 - April 2015

- Expanded Quantcast's systems, supporting 10x growth while containing costs

- Mentored junior operations engineers and new graduates, from onboarding to training them in large scale system operations and troubleshooting

- Managed Quantcast's capacity planning and budget, building out 17 edge PoPs worldwide while maintaining capacity and performance goals

- Automated the continuous integration of operating system security updates to keep all systems up to date and reduce our exposure to security vulnerabilities

- Rebuilt Quantcast's automated server install system based on cobbler, and automated the install and operation of Quantcast's services using puppet

- Managed Quantcast's relationship with hardware vendors, datacenters and ISPs, including vendor selection, performance requirements, and contract negotiation

Looksmart   San Francisco, CA
Operations Architect & Monitoring Manager   August 2007 - December 2010

- Designed and implemented Looksmart's new data center, with increased rack density and lower costs

- Overhauled monitoring systems to reduce check latency from 50 sec to less than 1 sec

- Increased monitoring capacity to support 300% growth in monitored servers to over 1000 servers

- Managed Looksmart's relationship with our outsourced Network Operations Center - including renegotiating our contract to save Looksmart $150k/year

Gemini Mobile Technologies   San Mateo, CA
System Software Engineer   January 2006 - August 2007

- Owned systems related product subcomponents including functional specification, design, implementation, unit testing and maintenance

- Ensured performance, security, and maintainability in designing and implementing new product features

- Supported QA engineers in developing test plans for fail-over, redundancy, reliability, and performance

- Extended network architecture to include load balancers for greater scalability

Jonah Horowitz
San Francisco, CA   incoming@jonahhorowitz.com

MediaMaster   San Mateo, CA
System Architect & Software Engineer   June 2004 - December 2005

Walmart.com   Brisbane, CA
System Administrator   June 2000 - September 2002
